

All construction workers required to be fully vaccinated by 13 November 2021

Roadmap easing thresholds: In addition to reaching the vaccination threshold at each point in the roadmap, easing restrictions will depend on public health advice as to the current epidemiology, and is also subject to continuing high levels of compliance within the construction sector.

The restricted area is all LGAs in metropolitan Melbourne and any regional LGAs currently subject to the same restrictions as metropolitan Melbourne (except curfew).

From 11:59PM, 4 October 2021

All sectors - open, subject to the following:

- Operators must complete an attestation that the site complies with CHO Directions.
- All construction sites must have sighted evidence that each worker has received their first dose of COVID-19 vaccine or evidence of a medical exception.

Small scale construction:

- Maximum of five workers per site plus the supervisor.
- Construction sites that employ workers that travel between the Restricted Area and Regional Victoria must have sighted evidence that these workers are fully vaccinated or have a medical exception.

Large Scale Construction:

- 25% of the workforce; OR
- 50% of the workforce if all crib rooms meet best practice standard and evidence has been sighted that all workers have been fully vaccinated for COVID-19 or evidence of a medical exception.
- Construction sites that employ workers that travel between the Restricted Area and Regional Victoria must have sighted evidence that these workers have had one dose or COVID-19 vaccine or have a medical exception, and be tested for COVID-19 twice per week with at least 72 hours between each test. Fully vaccinated workers can travel between the areas without the testing requirement.

State Critical Infrastructure Projects:

- 100% of the workforce if all crib rooms meet best practice standard.
- Construction sites that employ workers that travel between the Restricted Area and Regional Victoria must have sighted evidence that these workers have had one dose or COVID-19 vaccine or have a medical exception, and be tested for COVID-19 twice per week with at least 72 hours between each test. Fully vaccinated workers can travel between the areas without the testing requirement.

Early Development Sites:

- 20 workers per hectare if all crib rooms meet best practice standard.
- Construction sites that employ workers that travel between the Restricted Area and Regional Victoria must have sighted evidence that these workers are fully vaccinated or have a medical exception.

Prior to 11.59pm 4 October 2021:

- Workers who have had one dose can enter a construction site prior to reopening to undertake crib facility improvement activities, receive deliveries to prepare for work recommencing, or to undertake re-induction.

70%

Indicative date: 26 October 2021

Subject to continuing high levels of compliance within the construction sector.

- Large scale construction will increase to 100% if all workers are fully vaccinated, and subject to any additional industry obligation in *Victoria's Roadmap*.
- All other requirements from 5 October remain in place.
- All construction workers must have had their second dose by 13 November.

80%

Indicative date: 5 November 2021

Subject to continuing high levels of compliance within the construction sector.

Open with COVID Safe settings and additional obligations (from original Roadmap).

- All construction workers must have had their second dose by 13 November.
